Scenario ID and Given Prompt: Scenario #3 – Shopping Cart Functionality - Test the cart functionality

What is missing in the given prompt: No add/remove/update actions, no price calculation validation, no coupon/discount scenarios, no out-of-stock handling.

Weak Prompt Output from Copilot:

Test Case ID	Test Case Description	Test Steps	Expected Result	Preconditions
TC01	Upload a valid file (supported format, within size limit)	1. Navigate to upload page. 2. Select a valid file (e.g., PDF, 2MB). 3. Click Upload.	File uploads successfully, confirmation message displayed.	User logged in, file available locally.
TC02	Upload multiple valid files	1. Select multiple files (e.g., PDF + DOCX). 2. Click Upload.	All files uploaded successfully, listed in UI.	Multi-file upload feature enabled.
TC03	Upload unsupported file type	1. Select an unsupported file (e.g., .exe). 2. Click Upload.	Error message displayed: “File type not allowed.”	None

TC04	Upload file exceeding max size	1. Select a file larger than allowed (e.g., 25MB when limit is 20MB). 2. Click Upload.	Upload rejected, error message displayed.	None
TC05	Upload empty file (0 KB)	1. Select an empty file. 2. Click Upload.	Upload rejected, error message displayed.	None
TC06	Cancel upload mid-way	1. Start uploading a large file. 2. Click Cancel during upload.	Upload stops, file not saved.	Large file required.
TC07	Upload with slow internet	1. Simulate slow network. 2. Upload valid file.	Upload takes longer but completes successfully.	Network throttling setup.
TC08	Upload when session expired	1. Let session timeout. 2. Try uploading a file.	Upload fails, user redirected to login.	Session timeout configured.
TC09	Upload duplicate file	1. Upload a file. 2. Upload the same file again.	System either allows overwrite or shows “File already exists.”	File already uploaded once.

TC10	Upload file with special characters in name	1. Select file named report_#2026!.pdf. 2. Click Upload.	File uploads successfully, name displayed correctly.	None
TC11	Upload file with very long name	1. Select file with 200+ characters in name. 2. Click Upload.	System handles gracefully (truncate or accept).	None
TC12	Upload file during server downtime	1. Simulate server down. 2. Try uploading file.	Upload fails, error message displayed.	Server unavailable.
TC13	Upload file with restricted permissions	1. Select a file marked read-only. 2. Click Upload.	Upload succeeds (read-only doesn't block upload).	File permissions set.
TC14	Upload file with virus/malware	1. Select infected file. 2. Click Upload.	System blocks upload, security alert triggered.	Antivirus integration enabled.
TC15	Upload file via drag-and-drop	1. Drag valid file into upload area. 2. Drop file.	File uploads successfully.	Drag-and-drop feature enabled.

Rewritten ICEPOT prompt output from Copilot:

File Upload Functional Test Cases (with Content Validation)

Sc ID	Scenario Description	Prerequisite	Test Steps	Expected Result	Input Details
Sc01	Upload valid single PDF within 5MB	User logged in	1. Select valid PDF file (≤5MB). 2. Click Upload.	File uploads successfully, “File loading successful” message displayed.	File: Prescription_12345678_16102026.pdf
Sc02	Upload multiple valid PDFs with total size ≤30MB	User logged in	1. Select multiple valid PDFs (each ≤5MB, total ≤30MB). 2. Click Upload.	All files uploaded successfully, “File loading successful” message displayed.	Files: 6 PDFs, total 28MB
Sc03	Upload PDF exceeding 5MB	User logged in	1. Select PDF >5MB. 2. Click Upload.	Error message: “File size exceeded the limit – <filename>”.	File: Prescription_12345678_16102026.pdf (7MB)
Sc04	Upload multiple PDFs exceeding total 30MB	User logged in	1. Select multiple PDFs (total >30MB). 2. Click Upload.	Error message: “File size exceeded the limit – <filename>”.	Files: 8 PDFs, total 35MB
Sc05	Upload empty PDF file	User logged in	1. Select empty PDF (0KB). 2.	Error message: “File empty –	File: Prescription_12345678_16102026.pdf

Sc ID	Scenario Description	Prerequisite	Test Steps	Expected Result	Input Details
			Click Upload.	<filename> ".	
Sc06	Upload unsupported file type	User logged in	1. Select .docx file. 2. Click Upload.	Error message: "File format unsupported – <filename> ".	File: Prescription_12345678_16102026.docx
Sc07	Upload duplicate file name	File already uploaded	1. Select file with same name. 2. Click Upload.	Warning: "File already exist – <filename> " with "Proceed Anyway" button. If clicked, file overwrites existing.	File: Prescription_12345678_16102026.pdf
Sc08	Validate file name format	User logged in	1. Select PDF with incorrect name format. 2. Click Upload.	Upload rejected, error message displayed.	File: Prescrip_1234_16102026.pdf
Sc09	Validate file content structure	User logged in	1. Select valid PDF. 2. Verify content: Header "Prescripti	Upload accepted only if all content validations pass.	File: Prescription_12345678_16102026.pdf

Sc ID	Scenario Description	Prerequisite	Test Steps	Expected Result	Input Details
			on” centered, Patient ID, Patient Name, Date, Medicine list, Doctor’s signature.		
Sc10	Upload password-protected PDF	User logged in	1. Select password-protected PDF. 2. Click Upload.	Warning: “Access restricted file – <filename>”.	File: Prescription_12345678_16102026.pdf
Sc11	Cancel upload mid-way for single file	User logged in	1. Start uploading large PDF. 2. Click Cancel.	Upload stops, “File loading unsuccessful” displayed.	File: Prescription_12345678_16102026.pdf
Sc12	Cancel upload mid-way for multiple files	User logged in	1. Start uploading multiple PDFs. 2. Cancel all uploads.	Upload stops, “File loading unsuccessful” displayed.	Files: 5 PDFs
Sc13	Upload fails due to network issue	User logged in	1. Simulate network drop. 2. Upload valid PDF.	Upload fails, “File loading unsuccessful” displayed.	File: Prescription_12345678_16102026.pdf

Sc ID	Scenario Description	Prerequisite	Test Steps	Expected Result	Input Details
Sc14	Upload fails due to session timeout	User logged in	1. Let session expire. 2. Upload valid PDF.	Upload fails, “File loading unsuccessful” displayed.	File: Prescription_12345678_16102026.pdf
Sc15	Upload valid file with special characters in patient name	User logged in	1. Select valid PDF with patient name containing special characters. 2. Click Upload.	File uploads successfully, content validated.	File: Prescription_87654321_16102026.pdf

Observations on Improvements seen:

The weak prompt fetched the test cases assumed by them model. Whereas the model responded with precise and on topic response when detailed prompt in ICEPOT framework is given.
